Eagan High School , Eagan , MN

Jim Bouche (foreground), Eagan High Athletic Director & Assistant Principal, and John Ratzlaff, the school's Technical Director, like what they hear on the football field: loudspeakers from Community. Two Community R2-52's play into the field from the home side, two R2-474's play to the home bleachers, and two R2-474's play to the visitor bleachers. In addition, an R.5-HP covers the concessions area. Two QSC PLX3402 amps drive the two pairs of R2's. "The visitor side R2's are time delayed using the Rane RPM26z," says Audio Video Electronics' President, Stefan Svärd. " to match the R2-52's that blast across the field...The system really kicks. I only wish I had sped in a couple of Community R-6 subs!"
